

RESEARCH TASK:

Name:

HOW DOES A WINDMILL WORK?

Due date:

Research Questions:

- 1) How and where does groundwater form?
- 2) What are the parts of a windmill? Explain their purpose.
- 3) How does a windmill pump water to the surface?
- 4) Where are you likely to see windmills pumping groundwater to the surface?

Choose a method for presenting your research:

- a model and a speech explaining it.
- a slideshow presentation
- a video
- an instructive brochure
- a newspaper or magazine article

Include:

- a title and sub-headings where necessary
- paragraphs that answer each question
- photographs, diagrams, drawings or video footage that illustrate your points
- a bibliography to acknowledge your sources of information
