1.	Which 3D object is a square pyramid?	6. What is the name of this 3D object?
		spherehemispherehalf circlehalf circle
2.	How many edges does a cube have? edges	7. Which 2D shapes are needed to make a cylinder?
3.	This is the bottom view of a	
	spherecylinderpyramidcone	8. Choose the correct set of properties for a hexagonal prism. 8 faces 10 faces
4.	What shape am I? My net is made of two triangles and three rectangles.	○ 18 edges○ 18 edges12 corners8 corners
	triangular square prism pyramid	8 faces 10 faces 10 edges 18 edges 12 corners 12 corners
	rectangular triangular prism pyramid	9. How many triangles and one square are needed to make a square pyramid?
5.	Which net can be folded to make a	
	rectangular prism?	10. A cone has edge/edges?
