

Spider Facts: Report Planning

Name: _____

Date: _____

Write facts about spiders on the lines near each of its legs. Add your own notes near the bullet points. Use these notes to plan your research report.

The diagram features a central spider with the text "Spider Facts Report Plan" written across its body. Each of the eight legs is labeled with "fact 1" through "fact 8". The spider is positioned in the center of a page with horizontal lines on both sides. On each side, there are two sets of lines: one set with two bullet points above a line, and another set with two bullet points below a line, providing space for students to write facts and notes.
