HANDPRINT CHRISTMAS TREE

WHAT YOU WILL NEED:

- Large sheet of paper
- Green Paint
- Yellow Paint
- Other coloured paint for the pot

STEP 1

Lay your piece of paper somewhere flat on the ground with lots of space to move around it.

STEP 3

Paint a pot shape in the middle of the bottom of the paper.

STEP 4

Handprint Christmas Tree Making

Have your Brisbane Kids dip their hands in green paint and build up a large triangle shape of handprints (you may even like to draw a pencil outline as a guide first).

STEP 5

With clean hands, press two overlapping handprints in yellow (or other) coloured paint at the peak of the tree shape to form a star and allow to dry.

TIP: Once dry, kids may like to add additional coloured handprints or stamps to decorate the tree. Stick your tree on the wall for a gorgeous 2D version of a Christmas tree that little hands won't be in danger of destroying.
