	Data Tallying inform	Name: ring information in a table & creating a column graph.						
food	te foods o	of stude	food	1	elly	Record your data: 1) Make a list of foods in the food columns on your table. 2) Ask students to choose their favourite food from the list. 3) Record each student's favourite food using tally marks.		
						Construct your column graph: 1) Label the food names under the columns of the graph. 2) Label the numbers of students on the side of the graph. (You may need to make each box represent two students) 2) Colour in your columns to show the number of students who like each colourfood.
