

Name: _____

Date: _____

Mom is having an operation today. The nurse at the hospital showed us the way.

We walked through the corridors, past many rooms. Finally we got to Mom's room. There was a special bed on wheels that went up and down.

Mom put on a gown and cap. The nurse put a special needle into her arm for the drip. Then the orderlies wheeled Mom's bed out of the room and took her to the operating theatre.

The surgeons and theatre staff all wore gowns, caps, masks and gloves during the operation. We waited in the waiting room. The operation took about an hour. It seemed like ages!

After the operation Mom was brought back to her room. She was very tired but glad to see us. Later in the day, the doctor came to see how she was. He said she could go home in a few days.

Soon Mom was feeling better and she was able to eat a little food. We visited her every day.

Finally the day we were waiting for came! We thanked the nurses and took Mom home with us.
