

Name: _____

Date: _____

Continental Plates and Earthquake Zones

Draw arrows to show continental plate movement.

Research Activity

- * Use the internet to find out where recent large magnitude earthquakes have occurred in the world.
- * Record their magnitudes.
- * Locate these places on the map.

Questions:

- 1) Where is earthquake activity likely to occur on a continental plate?
- 2) What magnitudes usually cause the most damage?
- 3) If an earthquake occurs under the ocean, what additional damaging event could occur?
