Name:

Scale: 1 cm = 1 m

1) What's the total area of the house and terrace?

2) The house sits on a block of land with an area of 800 m^2. What fraction of the land is taken by the house? (extension: What's the percentage?)

3) What's the cost of carpeting the house at $60 per m^2?
(not including the bathroom or terrace)

- -

Extension:
Draw an aerial view of your place.

Homework:
Calculate the area of each room in your house.
What's the total area of your house?
